SUBCHAPTER D—GENERAL REGULATIONS OF THE ENVIRONMENTAL DATA SERVICE

PART 950—ENVIRONMENTAL DATA AND INFORMATION

Sec

950.1 Scope and purpose.

950.2 Environmental Data and Information Service (EDIS).

950.3 National Climatic Center (NCC).

950.4 National Oceanographic Data Center (NODC).

950.5 National Geophysical and Solar-Terrestrial Data Center (NGSDC).

950.6 Environmental Science Information Center (ESIC).

950.7 Center for Environmental Assessment Services (CEAS).

950.8 Satellite Data Services Division (SDSD).

950.9 Computerized Environmental Data and Information Retrieval Service.

APPENDIX A TO PART 950—SCHEDULE OF USER FEES FOR ACCESS TO NOAA ENVIRON-MENTAL DATA

AUTHORITY: (5 U.S.C. 552, 553). Reorganization Plan No. 4 of 1970.

SOURCE: 44 FR 54468, Sept. 20, 1979, unless otherwise noted

§ 950.1 Scope and purpose.

This part describes the Environmental Data and Information Service (EDIS), a major program element of the National Oceanic and Atmospheric Administration, and EDIS management of environmental data and information.

§ 950.2 Environmental Data and Information Service (EDIS).

The Environmental Data and Information Service is the first Federal organization created specifically to manage environmental data and information. EDIS acquires, processes, archives, analyzes, and disseminates environmental worldwide (atmospheric, marine, solar, and solid Earth) data and information for use by commerce, industry, the scientific and engineering communities, and the general public, as well as by Federal, State, and local governments. It also provides experiment design and data management support to large-scale environmental experiments; assesses the impact of environmental fluctuations

on food production, energy production and consumption, environmental quality, and other economic systems; and manages or provides functional guidance for NOAA's scientific and technical publication and library activities. In addition, EDIS operates related World Data Center-A subcenters and participates in other international data and information exchange programs. To carry out this mission, EDIS operates a network of specialized service centers and a computerized environmental data and information retrieval service.

§ 950.3 National Climatic Center (NCC).

The National Climatic Center acquires, processes, archives, analyzes, and disseminates climatological data; develops analytical and descriptive products to meet user requirements; and provides facilities for the World Data Center-A (Meteorology). It is the collection center and custodian of all United States weather records, the largest of the EDIS centers, and the largest climatic center in the world.

- (a) Climatic data available from NCC include:
- (1) Hourly Surface Observations from Land Stations (ceiling, sky cover, visibility, precipitation or other weather phenomena, obstructions to vision, pressure, temperature, dew point, wind direction, wind speed, gustiness).
- (2) Three-Hourly and Six-Hourly Surface Observations from Land Stations, Ocean Weather Stations, and Moving Ships (variable data content).
- (3) Upper Air Observations (radiosondes, rawinsondes, rocketsondes, low-level soundings, pilot-balloon winds, aircraft reports).
- (4) Radar Observations (radar log sheets, radar scope photography).
- (5) Selected Maps and Charts (National Meteorological Center products).
- (6) Derived and Summary Data (grid points, computer tabulations, digital summary data).
- (7) Special Collections (Barbados Oceanographic and Meteorological Experiment meteorological data, Global
